DETAILED ACTION

This Office Action is responsive to the amendment filed on 5/31/05, which has been fully considered and entered into the prosecution record. Claims 1-14 have been amended and new claim 15 has been added. Claims 1-15 are pending in the application.

Allowable Subject Matter

Claims 1-15 are allowed.

Claim 1 was indicated as allowable in the previous Office Action except for a few minor informalities, which have been addressed. Claim 10 has been amended to include the subject matter of claim 1. New claim 15 recites this allowable subject matter as well.

The following is an examiner's statement of reasons for allowance: None of the prior art of record discloses or suggests a method of measuring optical or electrical signal sequences wherein a multitude of consecutive signals are sampled periodically at a sampling time with at least one adjustable threshold value, wherein the probability that the value of the signal sequence at a sampling time is above or below each threshold value is measured, after a given period of time the threshold value is changed and the probability of the preceding threshold value is subtracted from the probability of the current threshold value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
